RECENT OPERATIONS

By Paul Rardin

Yesterday I picked up my favorite daily paper and read where the new coins to be put in circulation soon are probably going to be square and doughnut shaped. The half-cent pieces are to be shaped like doughnuts and the one mill pieces are to be square. The half cent pieces may be all right in their shape but I'm against square coins for after all, doesn't a fellow have hard enough time keeping whole pockets without having to tote around a bunch of coins with square corners punching holes in them all the time?

Every time I think about the new coins I can't help but think what a stack of them (especially the one mill pieces) I could have had if I had planted that five acres in cabbage after the December freeze.

If all present plans materialize Pahokee will soon have village mail delivery. That word village isn't used to make you think that Pahokee is a village but that is the way Uncle Sam terms the particular kind of mail delivery that Pahokee wants. It really is city delivery in every sense of the word but our dear Uncle insists on calling it village delivery—so village delivery it is. Anyway, after all streets are named, signs up designating said names and all houses in the town limits numbered there won't be much left for Uncle Samuel to do but put another man to work carrying the mail.

Members of the Pahokee town council were rather surprised at the small cost of operation of their Diesel unit in the water works plant when the water works superintendent, Robert Douthit, reported to them Tuesday night. He reported a cash outlay of $15.73 for fuel and lubrication oil for the month of June. Since I heard about the report I am planning to have the Fairbanks Morse people build me a Diesel unit on a smaller scale and have it installed in my flivver.

The condition of Conner's highway is coming in for its share of conversation at this particular time. Vegetable growers are wondering what is going to be done about rebuilding the road before another vegetable season is upon us. The stretch of road between Canal Point and the Martin county line was definitely described the other day by one grower who had occasion to drive his truck to Okeechobee. After completion of the trip a friend asked him about the condition of the highway and the disgusted farmer answered with one word: "lousy."

STEAMSHIP LINE BOOSTS FLORIDA SUMMER CLIMATE

"Not many years ago the idea of interesting northern folks to visit Florida for a summer vacation was considered just about the latest joke," states C. M. Haile, general agent of the Merchants & Miners Line at Jacksonville.

"This was very apparent when our people started shortly after the war to advertise summer ocean trips to Florida. The results of our pioneer efforts were discouraging at first, but we had confidence. The captains of our ships were steadfast in maintaining that the sea trip from our northern ports of Boston, Philadelphia and Baltimore was most enjoyable, with cool breezes all the way.

"The representatives of the Merchants & Miners Line who lived in Florida all year insisted to our advertising department that the summers here were moderate and healthy and enjoyable. So we continued our efforts, and after a few seasons our ships began to bring forty or fifty summer vacationists each trip, and they had a delightful time and gave us valuable word-of-mouth advertising.

"We have spent large sums advertising Florida in the summer, and in addition to newspaper advertising in northern cities, and distributed many hundreds of thousands of dollars. Now our summer ships come to Florida with full passenger lists, sometimes 300 on board."

22 PASS BAR

TALLAHASSEE, Aug. 1—(FNS)—Twenty-two persons were admitted to the practice of law in Florida, announced G. T. Whitfield, secretary to the board of bar examiners. Mr. Whitfield stated they had successfully passed the state bar examination.

Bonds Validated Monday Belle Glade Water Works

Citizens Hope for Immediate Construction Work To Start

A great deal of interest is being manifest this week over the possibility of the immediate construction of the new water works system for Belle Glade, and in this connection the Palm Beach Post of July 30th has the following to say which is self explanatory:

"Bonds which the Town of Belle Glade will post with the Public Works Administration as security for a loan for construction of the new waterworks plant and distributing system were validated in a circuit court decree Monday.

Total of the bonds approved is $76,000, but Herbert D. Beck, town attorney, pointed out that not all of this amount will be required by PWA. The waterworks is to be an $80,000 project, but $36,000 is to be a Federal grant, with $44,000 loaned to the town.

Attorney Beck said that officials believe the start of actual construction will be made soon, as the PWA loan has already been approved, and the formality of validating bonds as security was a necessary step.

The bonds are to be secured by income of the waterworks above operating expenses, with other town revenue if necessary, but officials hope to make the waterworks self-liquidating, the attorney said."

In addition to the above information the town is also applying for a loan for a waterworks building and city hall, the plans of which are now in the hands of Karl Riddle of Palm Beach, who is the engineer in charge.

A real water system is one of the greatest needs of Belle Glade at the present time and it is certainly hoped that the work will go forward shortly and be completed as rapidly a spossible.

POWER COMPANY TO INCREASE ICE PLANT CAPACITY

H. L. Lapp, Pahokee manager of the Florida Power and Light company, announces that his company is starting construction immediately of an addition to the Pahokee ice plant capable of manufacturing 85 tons of opaque ice per day and a 700 ton season store room. With this ice plant addition, the company's Okeechobee, Pahokee and Belle Glade plants will give the Glades area a daily ice manufacturing capacity of approximately 300 tons with aggregate ice store room capacity of 2,000 tons.

Mr. Lapp states that his company feels that the Glades area must be given the same class of service for the preservation of food stuffs while in transit as is given to growers and shippers in other parts of the country such as California and the Rio Grande valley of Texas, so that they can successfully compete with other districts growing and shipping winter produce.

During the 1934-35 shipping season the precooling of perishable commodities in refrigerator cars after loading, and using ice as a refrigerant, was introduced and became quite popular with the Glades growers and shippers. Ice precooling and top icing of various commodities was used to a much greater degree than during any previous season and inquiries indicate that much more extensive use will be made of these services during the coming season than formerly.

Mr. Lapp further states that because of this increase in demand his company has not only increased the Pahokee plant but also made improvements in their West Palm Beach, Fort Lauderdale and Miami plants, which serve the produce growers and shippers on the lower East Coast, so that their production of ice will be increased to approximately 600 tons per day. This should be ample to meet their regular demands, and provide sufficient surplus ice capacity to meet any unforeseen peaks in truck shipping from the Glades area during the 1935-36 season.

SPECIAL NUMBER AT LEGION DANCE

Officials of the American Legion in Pahokee announce a specialty number for the dance which will be held next Thursday night, August 8. Miss Edna Waltz will appear in acrobatic and tap dancing while the music for the evening will be furnished by Hugh Spence and His Mayflower Hotel orchestra.

PERMIT FILED FOR LAKE INTAKE PIPE

The Glades Water company of Canal Point has filed with the War department an application for a permit to place an intake pipe and crib in Lake Okeechobee. The Glades Water company operates the water plant in Canal Point and is preparing to give even a more efficient service in the future than in the past.

Plans for the proposed work are on file in the U. S. Engineers office in Jacksonville and at the sub-office in Clewiston. The plans call for a 6-inch intake pipe, projecting into the lake for a distance of 250 feet with an intake pipe and crib at its end. The top of the crib will be 5.5 feet above the elevation of the lake.

ROTARY CLUB

Dr. W. C. Young, who returned to his home in Canal Point this week after spending the past five weeks on vacation in northern states, was the speaker at the noon meeting of the Rotary club yesterday in the Legion pavilion. Dr. Young told of the different Rotary clubs he visited while away, not having missed a single week during the five he was gone.

The remainder of the noon program was given over to a round table discussion since the club has no planned programs during this month.

McKAY VS. CHANCEY

TAMPA, Aug. 1—(FNS)—Tampa's campaign for mayor opens this week and promises to be heated and swift until election day on September 3rd. Two contenders have officially qualified as candidates—ex-mayor D. B. McKay and Mayor R. E. L. Chancey who seeks re-election.

GENERAL AND GULFPORT TO FINISH LINK IN SOUTH SHORE LEVEE SOON

Near Bean City on the south shore of Lake Okeechobee the dredges General and Gulfport are digging nose to nose in an effort to soon close the last remaining link in the levee between Fisheating Creek and Bacom Point. With the progress being made at this time the remaining link of about 1000 or 1200 feet should be completed by next Wednesday.

After the completion of the remaining link in the south shore levee it is thought that the Arundel dredge General, under lease to the government, will proceed to Pahokee where it will start building levee near the Everglades Insurance agency north for a distance of two and one-half miles to Canal Point.

Work Begins Monday On Pahokee's New Sidewalks

Contractor Informs Town Attorney That Work Will Begin Monday

Thad Whidden, attorney for the Town of Pahokee, is in receipt of a telegram from the Gorham Construction company of Lake Worth which states that actual construction work will be started Monday on the new sidewalks. The telegram stated that equipment would be moved to Pahokee this week from the East Coast.

In the recent election freeholders in Pahokee voted 96 to 20 in favor of issuing certificates of indebtedness against the property in front of which the sidewalks will be built.

Town officials are hopeful that the contractor will start operations at the Pahokee Service Station on Belle Glade road and proceed south on Bacom Point road. It is thought that building of the longest stretch first will meet with the approval of the contractor.

DR. GORRIE GROUP TO FIGHT CANCER

TAMPA, Aug. 1—(FNS) — Although Dr. John Gorrie discovered the principles of artificial refrigeration and invented the world's first ice machine, his brainchild never netted him a dollar. In fact, the Apalachicola physician died in straitened financial circumstances as he never was able to find anyone to back his invention.

It is appropriate that big-minded ice manufacturers should honor the father of their industry through contributing to the humanitarian program of the memorial foundation that will keep forever green the memory of this distinguished physician through a crusade against cancer.

Statistics just issued by the State Board of Health show that cancer is making tragic advances in Florida. There is encouragement in the announcement by the world's most eminent medical authorities that cancer will be almost, if not entirely eliminated, by preventative methods and prompt treatment in its formative stages, within a generation, just as a similar campaign has brought tuberculosis down from top of the death list to seventh place. Thousands who are saved from tuberculosis are claimed by cancer.

NEW CAN FACTORY

TAMPA, Aug. 1—(FNS)—Florida's commercial possibilities were again recognized when the American Can company announced plans for construction of a factory here at an expenditure of $246,550. The new factory will be the largest construction in Tampa for several years.

Miss Frances and Evelyn Lee are visiting their sister, Mrs. Johnny Thomas, in Miami.

ROSENBERGS BACK FROM TRIP NORTH

Mr. and Mrs. Harold Rosenberg of Canal Point and Mr. and Mrs. L. C. Rosenberg of Clewiston are at home after a three weeks trip which took them through many interesting points in northern states.

While away the Rosenbergs visited friends and relatives in Buffalo, N. Y., Niagara Falls and surrounding country. Luray Cavern in Virginia was one of the interesting sights seen on the trip. They drove over the new "Sky Line" drive which is built on the uppermost heights of the Blue Ridge mountains. The highest point is 3750 feet.

In commenting on the sights at Niagara Falls Harold Rosenberg stated that the natural beauty had been cheapened by installation of colored lights. He also commented on the fact that Maryland has the best road sign system of any state visited. In Maryland, he said, all signs are painted in plain black and white.

Mold safety into the core of your being.

GRUESOME READING

But Maybe It Will Jar the Reckless Motorist

Publicizing the total of motor injuries—almost 1,000,000 last year, with 36,000 deaths—never gets to first base in jarring the motorist into a realization of the appalling risks of motoring, declares F. C. Furnas in the August issue of the Reader's Digest. He then proceeds to translate dry statistics into what he terms "a reality of blood and agony," as follows:

Figures exclude the pain and horror of savage mutilation — which means they leave out the point. They need to be brought closer home. A passing look at a bad smash or the news that a fellow you had lunch with last week is in a hospital with a broken back will make any driver but a born fool slow down at least temporarily. But what is needed is a vivid and sustained realization that every time you step on the throttle, death gets in beside you, hopefully waiting for his chance. That single horrible accident you may have witnessed is no isolated horror. That sort of thing happens every hour of the day, everywhere in the United States. If you really felt that, perhaps the stickful of type in Monday's paper recording that a total of 29 local citizens were killed in week-end crashes would rate something more than a perfunctory tut-tut as you turn back to the sports page.

An enterprising judge now and again sentences reckless drivers to tour the accident end of a city morgue. But even a mangled body on a slab, waxily portraying the consequences of bad motoring judgment, isn't a patch on the scene of the accident itself. No artist working on a safety poster would dare depict that in full detail.

That picture would have to include motion-picture and sound effects, too — the flopping, pointless efforts of the injured to stand up; the queer, grunting noises; the steady, panting groaning of a human being with pain creeping up on him as the shock wears off. It should portray the slack expression on the face of a man, drugged with shock, starting at the Z-twist in his broken leg, the insane crumpled effect of a child's body after its bones are crushed inward, a realistic portrait of an hysterical woman with her screaming mouth opening a hole in the bloody drip that fills her eyes and runs off her chin. Minor details would include the raw ends of bones protruding through flesh in compound fractures, and the dark red, oozing surfaces where clothes and skin were flayed off at once.

Those are all standard, everyday sequels to the modern passion for going places in a hurry and taking a chance or two by the way.

SCHOOL BOARD FILES REQUESTS ON 5 PROJECTS

Windstorm Insurance Purchased On Two Million Dollars Property

Windstorm insurance on public school buildings in the county, allowed to lapse last year, was ordered purchased again by the county school board at a meeting Tuesday afternoon.

The action followed receipt of an appraisal from the Insurance Exchange of the Palm Beaches setting the value of county school buildings, furnishings not included, at nearly two million dollars. Cost of the insurance on a fifty per cent basis will be about $11,300.

Five building projects for which PWA applications will be filed, were approved by the board. Estimates submitted by William Manly King, school architect, showed a total of $101,451 in the five projects, which include: Belle Glade, four room addition, 16,974; Conniston road, three rooms, $10,164; Delray Beach high school, three rooms, cafeteria and library, $21,852; Pahokee, new building of 12 rooms and cafeteria, $31,850; and South Bay, four room addition, $17,610. A proposed new Belle Glade-South Bay high school to cost $31,000 was deferred as a project, the board being unable to finance its portion of such a project if approved by PWA.

The board also voted to give a 10-foot strip, 300 feet long, to be made as part of a wider street near the Pahokee school grounds. The grant is conditioned upon a similar gift by Dr. W. H. Lair, of land on the other side of the street. This will enable elimination of a curve and narrow street, and will provide more parking space, it was said.

AT THE THEATRES

Prince, Pahokee

Sunday and Monday—"Charlie Chan in Egypt," with Warner Oland and Pat Paterson. Tuesday and Wednesday — "Break of Hearts," with Katharine Hepburn and Charles Boyer. Thursday — "Paris in Spring," with Mary Ellis, Lynne Overman. Friday and Saturday—"Terror of the Plains," with Tom Tyler.

Everglades, Belle Glade

Saturday and Sunday — "Hold 'Em Yale," with Patricia Ellis and Larry Crabbe. Thursday—"Party Wire," with Jean Arthur and Victor Jory.

NICK TO OPEN PAHOKEE BAR

Nick Jones, of Belle Glade, announces the opening of a new bar in Pahokee Monday morning, August 5, located in the Gold block next door to The Grill. Mr. Jones has installed all new equipment and states that he hopes to make the bar one of the most modern in the Lake region.

SUGAR COMPANY ADDS TO LANDS IN THE COUNTY

A deed filed in the office of the clerk in West Palm Beach shows transfer of three sections of land from the trustees of the Internal Improvement fund to the United States Sugar corporation. The land is composed of sections 29, 30 and 32 and was sold to the Sugar corporation for a sum estimated at $18,000 as shown by revenue stamps. The land is located southwest of Bare Beach.

Will Demonstrate Electric Cookery

Officials of the Florida Power and Light company announce a series of electric cookery demonstrations to be given by their home economic expert at the Woman's club building in Canal Point Tuesday afternoon. The demonstrations are scheduled to start at three o'clock and a cordial invitation is extended to all women to attend.

DIESEL OPERATION COST IN PAHOKEE WATER PLANT $15.73 MONTH OF JULY

At a meeting of the town council in Pahokee Tuesday night Robert S. Douthit, Jr., superintendent of the new Pahokee water works system, rendered to that body his report on cost of operation of the new Diesel unit for the month of July. The report showed a cost of $15.73 for the period beginning on June 30 and ending on July 29.

Mr. Douthit explained to the council that the new unit was operated for a total of 89 hours during that period and the fuel oil cost was $13.50 and the lubricating oil cost was $2.23. He also explained that the lubrication cost was more than it will be in the future since he made two changes of oil during the period on account of the fact that the machinery is new.

Black Bass Weighing Over 14 Pounds Is Landed at Stuart by One John Hoffman

It begins to look like John Hoffman, of Stuart, is in line for a little national publicity as well as a nice prize since he landed a black bass the other day that tipped the beam to 14¼ pounds. The fish will be entered in the Field and Stream national contest, but let the piscatorial reporter of the Stuart Daily News tell the story. It appears below:

Stuart's entry for fresh-water fishing honors for 1935 was landed today, a fourteen pound, four ounce big-mouthed black bass caught by John Hoffman in the famous South Fork fishing grounds.

The big fresh water battler, largest landed here so far this year, is expected to vie for national honors in Field & Stream and other national fishing contests.

Hoffman, veteran fishing guide, accompanied by his son, John, Jr., 12, was casting a Crippled Minnow and a Shakespeare reel in the South Fork waters about one-half mile above the concrete bridge when the big one struck.

"He hit on the surface," the lucky angler said, "and what a strike it was! I didn't know what I was hooked on to at first."

The fish put up a fine battle, leaping four times before it was brought to the boat and gently lifted in by the gills.

Pictures were being taken this morning under Chamber of Commerce direction, and the big black bass will be featured in the Chamber's publicity for the coming winter season.

Hoffman, who has been fishing local waters for the past 18 years, and regularly guides T. E. Golden, Georgia manufacturer on fresh water fishing expeditions, said that the bass was the largest he has ever caught.

"But there are some in the old South Fork as big or bigger than him," he told a Daily News man this morning. "Shortly after I caught the big one today, I had a strike that missed the plug—"

"How big a fish?"

"Well, now, I couldn't say. He made a hole in the water about like as if somebody had thrown in a Ford car."

SEMINOLES TO GET ATTENTION

FT. MYERS, Aug. 1—(FNS) — Ernest F. Coe, chairman of the Everglades National Park, in an address before the Seminole Indian association, outlined a tentative program which if carried out should go a long way toward settling the Indian problem in this state.

Contingent upon the establishment of the Everglades National Park and the setting aside of several hundred thousand acres of contiguous land at the north of the park, the plan proposes to settle the Seminoles in this territory, kept exclusively for their use and where they could live their own lives, protected from outside interference and influence. All game within the ares would be preserved for their use alone and there would be no closed season.

Decrying the dole as a deteriorating influence on Indian and white man alike, Mr. Coe further outlined plans whereby the Indian could augment his livelihood by having them serve as guides throughout the park area. Furthermore work for the entire tribe should be provided by encouraging them to make Indian souvenirs which would be sold to park visitors.

WILLIS RE-APPOINTED

TALLAHASSEE, Aug. 1—(FNS)—Governor Sholtz has announced the re-appointment of Bryan Willis as state auditor for a four year term.

And the baker isn't the only one who (k)needs the dough.

Spadaro Company Is Low Bidder Ortona Lock Job

Bid of $636,715.91 Lowest One Among Six Presented

Bids opened Wednesday by the U. S. Engineers in the Federal Postoffice building in Jacksonville revealed that the figure of $636,715.91, submitted by Spadaro Construction company of Moore Haven, was the lowest for the work of building the Ortona Lock in the Caloosahatchee River.

Lieut. P. A. Feringa, district engineer, who announced the figures Thursday, stated that the checking of the unit prices with the totals, which is necessary before the bid awards are made, had not yet been completed.

Other bids submitted yesterday were: W. Horace Williams, New Orleans, $824,318.62; W. S. Lockman, West Palm Beach, $719,123.86; Arundel, Baltimore, $973,224.79; E. H. Latham company, $797,799.26; Hardaway Construction company, Columbus, Ga., $857,310.49; government estimate, $770,942.89.

The lock chamber will be fifty feet in width and two hundred feet long. Walls will be of steel sheet piling capped with concrete and held in place by anchor bolts the same as the Moore Haven lock. The gates will also be of the same type as the hurricane gates, being semi-circular in shape and swinging into recesses in the walls. The gates may be operated either by hand or by power. The upper gate will be 21 feet six inches in height and the lower gate 32 feet. This is necessary because of the lower canal floor on the lower side of the structure. The floor at the upper end is at an elevation of -2.0 and at the lower end -7.0. This also makes the upper lock sill at an elevation of -.5 and the lower at -11.0. The top of the gates and the lock chamber will be 21.0. On either end of the locks, timber piling approaches will be built on each side 351 feet in length.

The island between the lock and spillway will be 95.5 feet in width and the spillway channel 104 feet wide. The spillway, itself, will be in two separate parts. On one side is the regular spillway for taking care of the normal discharge of water. This is built in three sections each 17 feet in width giving 51 feet over all width. The elevation of the dam in this section is at 10.0. On the other side is the specially designed spillway for taking care of flood waters and permitting a more rapid discharge of water from the upper river. This consists of two gates known as Taintor gates which are similar in shape to the hurricane gates only they are moved vertically instead of horizontally.

The base or seal upon which these Taintor gates rest is at elevation 3.0. When a more rapid discharge of water is desired these gates are operated easily by hand and raised by a windlass arrangement. A patent chain device makes the gate self-locking and makes it impossible for the gate to fall back while being opened. Each of these gates control a twenty foot opening and weigh in the neighborhood of fifteen tons each. The maximum flood stage of the river at this point is 18.0 and the minimum water stage 10.0.

Some of the immense quantities contained in the project are taken from the specifications. There will be a half-million yards of excavation, 85,000 c. y. fill, 29,000 s. y. sodding, 104,000 feet of timber piling, 57,000 s. f. of steel sheet piling, 100,000 board feet of lumber, 21,000 c. y. of stone rip-rap, 1,400 s. y. macadam driveways, 2,500 s. y. grouted rip-rap, 15,700 c. y. concrete, 211,000 pounds of reinforcing steel, 52,000 pounds steel tie rods for lock chamber, 542,000 pounds of structural steel and 134,000 pounds of miscellaneous metals such as steel forgings and castings and bronze fittings.

A. R. Broadfoot, construction supervisor for the U. S. Engineers will have charge of the field work on this project.

BAER-BRADDOCK FIGHT PICTURE TO PLAY PRINCE

Moving pictures of the Max Baer and Jimmy Braddock championship fight, which was staged in Madison Square Garden in New York a few weeks ago will be shown at the Prince theatre in Pahokee on Sunday and Monday, according to a statement made yesterday by Abe Dobrow, manager of the playhouse.

Fight fans who heard the fight as announced over the radio will now have opportunity to see the telling blows as landed by the young Irishman and learn how he happened to win the title. Mr. Dobrow announced that the fight film will be shown in connection with the regular show at no advance in admission prices.

FREIGHT RATES GO DOWN 15 PCT.

TALLAHASSEE, Aug. 1(FNS)—The State Railroad Commission has authorized railroad, truck and boat companies in Florida to reduce their freight rates approximately 15 percent on all hauls within the state.

The reduction was announced as the commission approved an application by the Central Truck Lines, Inc., for authority to reduce its rates. Previously the commission approved lower rates from Jacksonville to Orlando and points south.

The St. Johns River Line, operating a combination boat and truck service, was authorized to apply a differential rate, about 10 percent lower than truck or rail rates, for its service. The new rates, if adopted by the transportation companies, will be effective August 15, the railroad commission said.

VILLAGE DELIVERY IS IN THE OFFING FOR PAHOKEE AS JOB OF NAMING THE STREETS ENDS, HOUSES BE NUMBERED

A new postman should be trodding the new sidewalks of Pahokee within the next few weeks if plans of the present town council materialize in which they hope to secure from Uncle Sam village delivery of mail. Thus far all of the government's requests have been met and all streets named. Numbers have been designated for all houses, another request by Uncle Sam.

John T. Pickett, superintendent of streets, presented to the council Tuesday night a plat showing all streets with their prospective names. Houses will be assigned their numbers within a few days. Street signs must be erected and the numbers put on the houses before Uncle Sam will consent to employ an extra man to deliver mail in the town, it was said at the City Hall.

A DISGRACEFUL ROAD
Conner's Highway

It is merely a matter of weeks until another vegetable season will be here and still growers in the Lake region have no highway suitable over which to haul their produce to northern markets. Conner's highway between the Martin county line and Canal Point and between Canal Point and Twenty Mile bend is a disgrace. And—if vegetables are to be hauled by truck from this vicinity it is necessary to travel this piece of so-called highway which is full of chuck holes while pleasure cars on the East Coast speed along at break-neck speed over a ribbon of concrete.

Residents of the Lake region have made efforts in the past few months to have something done about rebuilding the stretch of road between Canal Point and the Martin county line, but their efforts thus far have been in vain. Whoever is responsible for the present condition of the road certainly must have the idea that the people of the Lake region are not entitled to a stretch of good road.

A fertile section, such as the Lake region, is entitled to some consideration when it comes to building highways. Certainly a section that produces as many vegetables as does this section should have some consideration at the hands of the proper authorities when it comes to providing highways over which to haul produce to market. Other sections of Palm Beach county have miles of concrete highways and the Lake region has been treated like a red-headed step-child as far as traversable roads are concerned. Other sections of the state have highways that lead to nowhere but are paved with concrete. Then, why, we ask, can't a fertile farming section have just a few miles of decent road?"

There is some talk at present of forming an Everglades Good Road association with one aim in view — that of improving highways around Lake Okeechobee. An organization of this kind, fostered by the prominent business men of the Lake region, could have a world of power—especially if its membership reached a total of 500— the hope of the proposed organization. A group of influential business and professional men banded together with one common purpose—that of better roads—could bring enough pressure to bear on the proper authorities to rebuild Conner's highway from bottom to top.

Just so long as the residents of the Lake region sit supinely by and listen to a bunch of promises and hokum handed out by a small band of politicians—just that long the residents of the Everglades will get nothing but promises. If these same residents will assert their demands to the proper authorities in the proper manner relief will come and that soon. If the people of the Lake region are desirous of having Conner's highway rebuilt, then let's join together in a common purpose and let our wants be known. If after the proper authorities have been contacted and no action is secured—there is just one way left to get action—with ballots.

To call Conner's highway a disgraceful road is to put it mildly. It has been called by many other names during the past few years but to think that such a highway is to be found within the confines of Palm Beach county is a disgrace within itself. A county with as many fine roads as has Palm Beach and to think that the richest agricultural region in the world—not even excepting the Valley of the Nile in the land of the ancient Pharoahs—is forced to haul produce over such a road as Conner's highway is enough to irk one who has the patience of Job.

OBSERVE ANNIVERSARY

MIAMI, Aug. 1—(FNS) — The thirty-ninth anniversary of the founding of Miami—whose population has increased from 500 persons to 127,601—will be observed here this week with fitting ceremony. More than 2,000 Miami "Pioneers"—city residents for 20 years and more—were to be honor guests at an elaborate program in the municipal auditorium. Nine tableaux will depict the growth of the city from a Seminole trading post to the "playground of the world."

The rest of your days depends on the rest of your nights.

Flat chests are like flat tires—you can't go far on either.

On the average throughout the world it takes seven acres of land to feed 1 person.

AS OTHER EDITORS SEE IT

Fort Myers News-Press: A New York magistrate has started a drive against semi-nude pedestrians on Coney Island. He fined a man $2 for strolling through the streets with his bathing suit rolled down to his midriff, and remarked:

"A man or woman must wear a bathrobe or some other covering that really covers from shoulder to knee. Conditions in Coney Island would be better if people would suppress their selfishness in the interests of others."

Speaking of selfishness, the judge is just an old meany when he starts putting Mother Hubbards on bathing girls although nobody cares how many clothes he drapes on the men.

Sebring American: It is hard for us to realize what a difficult time the Jews and Catholics in Germany are having in attempting to please, or at least not displease Lord High and Mighty Hitler. In the palmy days when Emperor Wilhelm was the head of the nation, he appeared willing to share honors with God. "Me and God." Apparently Hitler has thrown God into the discard as unnecessary. He himself is self-sufficient. But let him beware! Little does he realize, as he rides on the crest of popular approval, that he is riding to a fall. God is not mocked.

Miami Herald: Reported discovery of "solid gasoline which can be used in motors without danger of accidental fire promises a worldshaking economic shuffle, but we wonder if it may not turn to be something like the crude oil engine which so far have failed to make any impression upon the automobile industry.

This new form of gasoline is said to be of the consistency of cheese. Under certain conditions, the solid vaporizes and the gasoline fumes are drawn into the engine for explosion. There is no liquid to catch fire in an accident. There is no need for tanks and the other paraphernalia of the present gasoline industry.

In the event solid gasoline were to be adopted generally, the filling station as we know it would cease to exist. For solid gasoline that could be preserved indefinitely in cardboard containers could be marketed in any store, just as groceries or magazines are sold. If the filling station were made obsolete, what then would Americans put on corner lots?

Palm Beach Post: Columns of daily newspapers reveal a host of personalities, characters and just plain folks, all a part of humanity, but each as different from the others as ether from earth.

It would be a platitude to philosophize on the axiom that "no two persons look alike; but to observe that no two persons hope and aspire alike might provide a new perspective from which humanity may view itself.

All healthy men and women entertain ambitions and aspirations in varying degrees. The cynic says that the vast majority of modern human beings aspire to wordly wealth with no thought of mental perfection, public service or philanthrophy. Then there are men and women who think only of others and of serving mankind. The art world is peopled with men and women who live for art and art alone. But among all men there is an instinctive hope for fame, or at least, some prominence.

This human yearning for the regard of others and the distinction of superiority or individuality reveals itself differently in different persons. There is the man or woman who has braved scandal and perhaps social ostracism for publicity and notoriety. There is a class which aspires for nothing more of fame than recognition in the community; others are content with statewide prominence, a few aspire to national repute; and a select few gain world renown. Many have won fame without seeking it, but more have sought fame in vain.

It is to be feared that most mortals do not give assent to the Hubbardian epigram—"The reward of a good deed is the doing," and in that lies the distinction between the genius and the ordinary person.

TEMPERATURE AND RAINFALL IN CANAL POINT

Week Ending July 28, 1935

Date	Max.	Min.	Rain
July 22	88	71	.99
July 23	90	70	1.12
July 24	89	73	—
July 25	89	74	—
July 26	91	72	—
July 27	86	74	.33
July 28	93	72	—
Average	89	72 t'tl	1.78
Total rainfall since Jan. 1, 1935			19.44

It is claimed that automobile accidents are increasing faster in rural areas than in urban areas.

AT THE Churches

COMMUNITY M. E. CHURCH
Canal Point

Rev. G. E. Bennett, Pastor

Church school, 9:45 a. m., N. V. Maxson, superintendent.

Morning service, 11:00 a. m. Subject: "An Ear of Corn."

Epworth league, 7:00 p. m., Dorothy Maxson, president.

Evening service, 8:00 p. m. Subject: "Home Making."

The Ladies Aid society will meet at the home of Mrs. G. V. Hudson Wednesday afternoon at 2:30 for the monthly meeting.

Rev. Bennett and family will leave on Tuesday, August 13, for a two weeks' vacation. They will go to Zephyrhills, Fla., where Rev. Bennett was a former pastor for four years. Arrangements are being made for the services of the church during their absence. In the morning service, August 18, the Children's Day exercises will take the place of the morning service. Mrs. W. A. Adams will have charge of the program assisted by the teachers of the church school. An invitation will be extended to the singing class to put on a musical program for the evening service of the same date.

Boy Scouts Go Camping Again

Seventeen Boy Scouts of the Canal Point and Pahokee troops left last Monday morning for Fisheating creek for a three days' camp. After several delays by "blowouts" and car trouble they arrived in camp about 1:00 p. m., at the same place where they camped about a a month ago. During the first night there was not much sleeping in camp as the Scouts wanted to work off some of their surplus energies, but on the following night quietness reigned throughout the camp everyone making up sleep lost on the previous night. The mosquitos also made life miserable on the first night but the Scouts prepared for the raid so that they were able to have a good night's rest.

The bass fishing was fine as a large number of fish were caught during the camp by the Scouts. Among those carrying off the honors were the following: Rev. Bennett, two, each weighing five pounds by the camp scales; Lester Hand had one weighing 5 pounds, Kyle Hand, one 3½ pounds, Jordan Parker of the Pahokee troop, one 3¼ pounds, besides a number smaller ones caught by other members of the camp. A large swimming hole right in front of the camp furnished lots of sport for the Scouts. They hiked, fished swam, played games at night around the campfire and had a good time in general.

They broke camp Wednesday morning about nine o'clock and after two delays from "blowouts" on the Scout truck they arrived home about one o'clock a tired but happy lot. They will be looking forward to another trip in God's great of doors some time in the future. Rev. Bennett had charge of the Scouts assisted by Arthur Spooner of the Pahokee troop and Lester Hand of the Canal Point Scouts. Each troop had a "Mascot," John Harrington from Canal Point and "Boggy" Hawkins from Pahokee.

FIRST BAPTIST CHURCH
Belle Glade

A. W. Taylor, Pastor

We do not seek to impose a creed but to share a faith.

Come and worship with us and see for yourself.

11:00 a. m. Lord's Supper. Subject, "Look to Yourselves."

8:00 p. m. Song and praise service led by W. J. Cunningham. Subject, "Forgive and Forget."

CALLS FOR YOUR SERVICE

Sunday School, 9:45, G. E. Evans, superintendent.

The regular bi-monthly meeting of the W. M. U. meets Tuesday at 3:00 p. m., with Mrs. Paul Taylor.

Cottage prayer meeting Wednesday night to be announced.

If you would have less daily care, make a habit of more daily prayer.

ROOSEVELT HIGHWAY

TALLAHASSEE, Aug. 1—(FNS) — Another link in the Franklin D. Roosevelt Memorial Highway has just been completed in Georgia and a fitting celebration ending with a barbecue was held at Richland.

The highway will be formally dedicated to the president on October 15 at which time executives of both Florida and Georgia will assemble to pay tribute to our chief executive.

PETERSON HONORED

WASHINGTON, D. C., Aug. 1 — (FNS)—Representative J. Hardin Peterson of Florida was recently given the commission of Lieutenant Commander in the Naval Reserves in a ceremony at the Naval department. The presentation was made by Admiral Adolph Andrews of the Bureau of Navigation.

Advertise it in the Everglades News—it will get results.

SOUTH BAY NEWS

ENTERTAIN YOUNG FOLKS

An enjoyable evening was spent Wednesday when a group of young people met at the home of Mary Louise Mitchell to spend the evening in playing games. Refreshments were served later to June Goodbread, Elsie Mae Willits, Mary Louise Mitchell, Mary Louise Jefferies, Richard Vehle, Betty Grace Vehle, "Red" and Dick Miller, John Billy Mathis, Jack Ratley, Mary Challencin, Raymond Wilder, Willie Boots, and Charline and Maurine Mathis.

BIRTHDAY PARTY

Mrs. P. E. Goodbread entertained her son, Ralph, at a birthday party Wednesday afternoon at her home. Games were played and enjoyed by Ralph Goodbread, Billie and Betty Jo Bennett, Sherly and Noel Campbell, Margaret Hayes, Howell Goodbread, Mrs. Jack Bennett, Mrs. Campbell and Alton Goodbread.

The primary class of the Community church enjoyed a party at the home of Mrs. F. W. Mutchler recently.

Mr. J. W. Rashley motored to West Palm Beach Wednesday.

Elsie Mae Willits was an over night guest of Helen Rashley on Thursday.

Mr. and Mrs. F. W. Willits motored to West Palm Beach Friday on business.

Mr. David Pittman and Mr. Leslie Lyons visited the Anjima home recently.

Mr. and Mrs. Chester Shaw returned Thursday from Cross City.

Mr. J. L. Mathis, Mr. C. F. Denton, and Richard Vehle spent Thursday in West Palm Beach.

Captain E. E. Forbes of Rita Island was visiting here Friday.

Mr. Kenneth Lockmiller returned from Arcadia Friday.

Oneil Walker is reported to be ill with the mumps.

Willie Boots returned from Cocoa Tuesday.

Mr. and Mrs. Doc Van Landingham returned Thursday from West Palm Beach.

Mr. and Mrs. George Church and Mr. and Mrs. Graham Church were visitors here Friday.

MOTOR BOAT RIDE

Mr. and Mrs. H. O. Mitchell entertained Friday a group of people to a motor boat ride and surf boad rides. The ones enjoying this feat were: Mr. and Mrs. Richard Vehle, Richard Vehle, Jr., and Betty Grace Vehle, of Senora, Texas, Mrs. Sam Fleming of Chosen, Mrs. Edith Van Landingham, Charline and Morene Mathis, Mary Louise Mitchel, Mary Grace Denton, Bobby Jean Mathis and Charles Denton.

ENJOY OUTING

Mrs. Maude Taylor, Mr. and Mrs. J. L. Mathis and children, John Billy, Charline, Morene, Bobby Jean; Mr. and Mrs. Richard Vehle and children, Richard, Jr., Betty Grace; Mr. and Mrs. C. F. Denton and children, Charles, Mary Grace; Mr. and Mrs. Mitchel and daughter, Mary Louise; Mr. and Mrs. Sam Fleming, Dick and "Red" Miller, Mr. Wydner, went to Lake Worth Sunday and enjoyed their supper at the casino.

Mr. I. Corbett and daughters, Lura and Bea, motored to Canal Point Saturday.

Mr. and Mrs. Denhart visited in Clewiston for a few days last week.

Mrs. Wm. Jefferies visited Mrs. Scullen Thursday.

Mr. Jefferies and children, Louise and Billy, motored to Miami Thursday to visit Mr. Jefferies' mother, Mrs. Clara Jefferies, who is reported to be very ill.

Mrs. Julius Herring returned Friday from Waycross, Ga., where she has been visiting friends and relatives.

Lillie Mae Corbett, Mary Challancin, and Martha Register motored to Pahokee Wednesday afternoon.

Deelie Woodham, Mr. Earl Lewis, Eric Hartline, Beth Hamrick, Lura Corbett, Bill Hamrick, and Bea Corbett enjoyed Thursday evening at the skating rink in Pahokee.

BIRTHDAY PARTY

Evelyn Belcher celebrated her ninth birthday with a party Saturday afternoon. Games were played and refreshments served later. Guests included: Norma McCurdy, Quinie Walker, Pugie Walker, Elonor Ruth Ratley, Helen Ratley, Audrey Belcher, Lottie Woodham and Evelyn Belcher.

Lucile Barnes has returned home after spending a few days with the J. C. Weeks and family. Merits and Christina Weeks accompanied her home to spend a few days with A. B. Barnes and family.

S. J. Fisher made a trip to West Palm Beach one day this week.

Mr. S. S. Ely and Mr. Frank Franz made a trip to DeLand to spend a few days and then will continue on to Washington, D. C., and New York.

Mr. R. E. Sheats is reported to be ill at his home.

Mr. and Mrs. Kenneth Lockmiller and Mrs. Elizabeth Lockmiller left Wednesday morning for Arcadia.

Mrs. Rose Manga of Belle Glade called on Mrs. W. M. Jefferies who is convalescence at her home.

Mrs. Sam Fleming of Belle Glade spent Thursday in South Bay with her mother, Mrs. C. F. Denton.

Mr. W. M. Jefferies and children made a trip to Miami Thursday.

Mr. and Mrs. E. E. Forbes entertained Tuesday evening at a party, given in honor of Mrs. Emma Williamson, house guest of Mrs. W. H. Rawle.

Roy Boots made a trip to West Palm Beach Wednesday.

Mrs. W. H. Rawle left Wednesday to spend the remainder of the week in West Palm Beach.

Mr. and Mrs. W. W. McCurdy and family, John M. McCurdy, Shelly Connell, and Carl Bridges were dinner guests at the home of Mr. and Mrs. Roy Norman Sunday.

Junior Walker is reported to have the mumps.

Mrs. J. W. Rashley was taken to the hospital Tuesday night.

Elanor Nobles returned home Friday after visiting at the W. C. Allen home.

Mr. and Mrs. Vehle, Dick and Betty Grace from Senora, Texas, are visiting Mr. and Mrs. J. L. Mathis and family.

Mr. Harry Mitchel, Mr. Richard Vehle, Dick Vehle, Mr. J. L. Mathis, and John Billy Mathis motored to No. 3 locks for a fishing trip Wednesday.

Mr. and Mrs. C. F. Denton, Mrs. J. L. Mathis, and Richard Vehle were visitors of Mrs. V. C. Denton of Pahokee Wednesday.

Mr. Barnes, accompanied by Mrs. Barnes and children, motored to Fort Lauderdale Wednesday.

Elmo Dean returned home Tuesday after spending a week with A. B. Barnes and family.

Thomas Barnes is visiting Mr. and Mrs. A. B. Barnes and family this week.

Lucile Barnes is spending this week with Mr. and Mrs. J. C. Weeks and family of Canal Point.

TO EXEMPT IMPORTS

WASHINGTON, D. C., Aug. 1 — (FNS)—A bill has been introduced in the house by Representative Hardin Peterson, seeking to exempt from tariff duty exhibits brought into Florida for the Pan-American exposition to be held in 1936. Previously he had introduced a bill for an appropriation of $500,000 in federal money for the exposition.

It is the cause, not the death, that makes the martyr.—Napoleon.

WILL CHRONICLE FLORIDA'S PART IN WORLD'S FAIR

DeLAND, Aug. 1—(FNS) — George Clements, formerly with the editorial department of the DeLand Sun News, has retired from the staff to take up the work of compiling a history of Florida's participation in A Century of Progress at Chicago, in 1933 and 1934.

It was thought at the time Mr. Clements became connected with the Sun News that he could find time, in addition to go on with his writing of the history but he found that the correlation of the necessary facts, figures, pictures, etc., from his own files as well as from the voluminous files in the office of General Manager Earl W. Brown, together with trips to Tallahassee and Jacksonville for research among the files in the state departments and in the headquarters of the Florida World's Fair commission, could not be done and give the paper the attention it should have.

From now on Mr. Clements will give his undivided time to the compilation of the history of Florida's part in the greatest international exposition of modern times in order that future generations may know of the wonderful work done in the way of making the world Florida conscious, during two glamorous years.

FLORIDA'S BANKS REPORT DEPOSITS UP 34 PER CENT

TALLAHASSEE, Aug. 1—Figures released today by Comptroller J. M. Lee show that Florida state banks had 34 per cent more money on deposit June 29, 1935, than in June, 1933.

Total deposits, Lee said, were $53,551,000 at the close of last month, 8 per cent greater than on last December 31.

During the six months' period there was an increase of 14 1-2 per cent in cash on hand and amounts due from other banks; approximately 20 per cent in securities deposited with the state treasurer for the stockholders' reserve fund deposit; 17 per cent in county and municipal bonds owned; and 4 per cent in loans.

"Ordinarily bank deposits in Florida are less in the summer than in the winter," the comptroller said. "I am particulrarly gratified to note this continued increase in our state banking resources."

Wood for walking sticks and umbrellas is grown like corn and oats in forests of small saplings which take about four years to reach the required size.

It is estimated there are about 9,000,000 delinquent and needy children in the United States.

According to the chief of the forest service, one-third of the area of the Continental United States is forest or potential forest land.

Art is more Godlike than science. Science discovers; art creates. — John Opie.

NOTICE

Notice is hereby given that the following described lands, or so much thereof as will be necessary to pay the amount due for taxes for the year 1934, herein set opposite to the same, together with the cost of such sale and advertising will be sold at public auction on the 2nd day of September, A. D., 1935, at twelve o'clock noon at the Town Hall in the Town of Pahokee, County of Palm Beach, and state of Florida.

FUTURE OF HONEY INDUSTRY DEPENDS ON COOPERATION

Cooperation by beekeepers and forest fire control are necessary for the future development of the honey industry in Florida, Robert E. Foster, state apiary inspector, said recently.

Without cooperation, he pointed out, the industry cannot forge ahead and without control of forest fires, valuable nectar-producing plants are destroyed.

"The lack of cooperation among beekeepers in Florida is holding honey production back greatly. The beekeepers form organizations and then become afraid that the other fellow will get more benefits from them than they will. They become selfish and let petty jealousy and personal enmity destroy their organizations," Mr. Foster explained.

On the loss of honey from fires, the State Plant Board inspector made this statement:

"While it is true that careless burning of the woods injures every citizen of Florida, it probably injures beekeepers more directly than any other group. Thousands and thousands of acres of woods where gallberry, saw palmetto, and other nectar-producing plants grow are burned every year and in some instances twice a year. Burning of these plants destroys all hope of bees gathering nectar from them. There are many instances in the state of beekeepers having had to feed their bees to keep them from starving as a result of the woods having been burned. Every beekeeper should do all in his power to prevent the burning of woods."

Establishment of several storehouses in the state in which all honey could be taken and blended into uniform grades would also be a very definite and valuable contribution to the development of the Florida honey industry. "If we were in a position to put out established grades, we would be unable to supply the demand. It is much easier to sell a carload of honey of an established grade than it is to sell 200 pounds of mixed grades. Three or four plants of this type would make it possible for the small producer to dispose of his honey readily, and thereby stop a great deal of price-cutting. This cannot be done without cooperation," Mr. Foster said.

Florida produces a larger variety of fine table honeys than any other state in the union. To get the maximum benefits from the advantages they have over those in other states, Florida beekeepers must cooperate—price-cutting and other tactics of this nature handicap the industry. When they meet at Cocoa early next month, they should make a concerted effort to "get-together" on some of these matters.

NEW SALT SHAKER KEEPS SALT DRY

TAMPA, Aug. 1—(FNS)—Constant rains and penetrating dampness in this area for several weeks have set housewives all agog over the old question of how to make salt "pour when it rains." But the problem is being solved by Ever-Dry salt shakers.

These unique containers are a product of a Clermont, Florida concern and the secret of their success lies in a stopper of chalks composition which absorbs all moisture, keeping the salt dry and ready to pour freely through any kind of weather.

During the last decade the death rates in Florida from typhoid and diptheria have declined almost to the irreducible minimum.

The place for the knocker is outside the door.

BELLE GLADE NEWS

EARLE BOLES WEDS MISS LOUISE CREIGER

The marriage of Miss Louise Creiger and Earl Boles was performed Saturday afternoon at the Community Methodist church with Rev. J. O. Jameson officiating. Mr. and Mrs. Clarence Boles, parents of the groom, Mr. and Mrs. James Hutchens, and Mr. and Mrs. Bob Householder accompanied the couple.

The bride is the daughter of Mr. and Mrs. J. H. Creiger of Niles, Ohio, and came here recently to visit friends.

Mr. Boles came to Belle Glade several months ago with his parents and has been associated with the Latham Construction company, now engaged in building the dike. A talented musician, he has become widely known as a soloist at the churches and night clubs.

The couple will spend several days in Palm Beach before mak-

One of the finest homes in the lake section is that of Mr. and Mrs. Henry Stoltenberg on the Clewiston road. The house, which will be ready for occupancy in about two weeks, is of two-story, Spanish design with tile porches, patio and baths, plate glass windows, steel and chromium frames and is ultra-modern in every detail.

Mr. and Mrs. Hampton Holloway have just moved into their new seven room bungalow which is of frame construction and is modern throughout.

Mr. and Mrs. Allen Greer recently moved to their new eight room home on the Palm Beach road. It is a one story house of frame construction and is modern in every way.

Mr. and Mrs. Gene Camp, Mr. and Mrs. Sam Hendry, Mr. and Mrs. Max Morris, Mr. and Mrs. Herbert Beck, Mr. and Mrs. Ray Whitlock, and Mr. and Mrs. Frank Kelly are among those who have recently moved or soon will move their families into new homes.

Those who are adding rooms, porches and making other extensive improvements to their homes are Robert Y. Creech, George Farnall, Lou Betzner, John Harris, Leroy Alspaugh, Merchason Wilson and Miss Fritzie Dryden.

Others who expect to start new homes in the near future are James Darden, Otis McWhorter, Richard Townsend and Luther Jones.

Closing exercises of the vocational Bible school were conducted at the Community Methodist church Sunday afternoon. The school, which includes a two weeks course of kindergarten, woodcraft, all kinds of hand work, Bible study and music, was introduced last year by Rev. J. O. Jameson, and proved to be such a success that it was continued this year with added features and the enrollment increased to 70 pupils.

All hand work was on display at the church, and prizes were awarded.

The program was opened by the kindergarten class, under the direction of Mrs. Jameson. Miss Margaret Risk assisted Mrs. W. D. Tidwell in directing her class in song. Mrs. Irene Overcast had charge of the junior group, who recited the 67th Psalm. In this class, Clark Ogle and Hazel Altman received prizes for Bible work.

Mrs. C. E. Reidel, assisted by Mrs. J. F. Browne and Mrs. C. R. Mansfield, had charge of the intermediate group, who sang and gave recitations and Bible quotations.

As the culmination of a romance which began in Ohio three years ago, Miss Louise Creiger and Earl Beles were married Saturday afternoon at the Community Methodist church with the Rev. J. O. Jameson officiating.

Mrs. Boles is the daughter of Mr. and Mrs. J. H. Creiger of Niles, Ohio, and came here recently to visit friends.

Mr. Boles came to Belle Glade a year ago with his parents, Mr. and Mrs. Clarence Boles, and is associated with the Latham Construction company.

After the ceremony, the couple left for Palm Beach, where they will visit before making their home in Moore Haven.

Mrs. C. A. Davis is spending a month in Jacksonville and New York with relatives.

Miss Evelyn Long has gone to Miami to make her home with her parents, Mr. and Mrs. J. B. Long, after spending two years here with her aunt, Mrs. George Tedder.

Mrs. George Rawls and Mrs. Marjorie Dodd have returned from Miami, where they visited for several days. Miss O'Delle Rawls accompanied them to Boynton, where she visited Miss Peggy Meredith.

Miss Theo McWhorter is visiting Mr. and Mrs. George Woodward at West Palm Beach.

The Rev. and Mrs. J. O. Jameson and children, Ruth, Elizabeth, Mary, and Edmund, have gone to Wabasso to spend two weeks with relatives.

Lou C. Betzner, Mayor R. K. Harris, Sam Hendry, George Rawls and others have returned from Lake Trafford, where they fished.

Mrs. C. E. Davis is spending a month in Jacksonville and New York with relatives.

Mr. and Mrs. W. H. Thompson and son, Merle, have returned from Miami, where they visited relatives.

Miss Evelyn Long has gone to Miami to join her parents, Mr. and Mrs. J. B. Long, after spending two years here with her aunt, Mrs. George Tedder.

Mrs. George Rawls and Mrs. Marjorie Dodd have returned from Miami, where they visited several days. Miss O'Delle Rawls accompanied them to Boynton, where she visited Miss Peggy Meredith.

Miss Theo McWhorter is spending a week in West Palm Beach as the guest of Mrs. George Woodward.

J. N. Coble has gone to the Veteran's hospital in St. Petersburg for a month's treatment.

Miss Sally Taylor is visiting in Tampa.

Dr. and Mrs. Milam Anderson and daughter, Miss Domaris, have returned from Lakeland.

T. E. Woolbright and Homer Adams have returned from Boynton after visiting relatives.

Mrs. Henry Stoltenberg, Mrs. Joe Freedlund and daughters, Elaine and Carolyn, have gone to Miami to visit relatives.

MIAMI HOSPITAL MAY GET FUND

MIAMI, Aug. 1—(FNS)—Miami's proposed Marine hospital building project now is awaiting final action by the allocaton division of the United States Public Health Service, having been approved by the procurement department.

Advice from Congressman Mark Wilcox explained that quicker action in obtaining actual building operation here would have been possible had it not been for numerous restrictions attached to the overnment's building program.

One specification which had to be met, states that each project must cost approximately $1,100 per man. This figure was derived by dividing the more than $3,000,000,000 public works expenditure by the estimated number of unemployed men in the country. Cost of the Miami project on this estimate would be about $4,250 a year per man.

AIR TICKETS FREE

MIAMI, August 1—(FNS)—Round trip airplane tickets to Havana will be awarded to man and woman member of the Miami Biltmore Country club showing the greatest improvement in their golf handicaps between now and September 2nd. The prizes will be awarded by Col. Henry L. Doherty, president of the club.

SOCIAL and PERSONAL ITEMS
Pahokee and Canal Point

Mrs. Essie McClellan and daughter, Evelyn, returned last Sunday. Mrs. McClellan attended the summer session at the University of Florida and Evelyn spent several weeks with relatives at Bushnell, Fla.

Mr. and Mrs. T. M. Chastain, Mr. and Mrs. Lovett McCord and daughter, Patsy Ruth, returned this week from Thomasville and other points in Georgia.

Mrs. L. C. Goolsby and daughter, Maureen, returned last Sunday from Gainesville where Mrs. Goolsby attended summer school.

Martin Oliver has returned from Gainesville, where he has been visiting relatives during his vacation. He is employed in the store at the Sugar mill.

Mr. and Mrs. Jack Barrett were business visitors in West Palm Beach last Monday.

Misses Anna Lee and Clara Nell Boynton returned last Saturday from Alamo and Glenwood, Ga., where they visited friends.

Mr. and Mrs. H. G. Boynton, Misses Anna Lee and Clara Nell and Joe Tom Boynton attended a family reunion of her family at Brewster, Fla., last Sunday.

Dr. and Mrs. W. C. Young returned Tuesday from points in Kentucky. They have been away five weeks.

Mr. and Mrs. W. B. Elam and family have returned from points in Georgia, Tennessee and Kentucky, where they have been vacationing.

Carlos Orr left this past week for a vacation to be spent in Homestead, Fla.

Mr. and Mrs. Bruce Johnson have returned to their home after a visit with relatives in Jacksonville.

Miss Carline Cone, daughter of Mr. and Mrs. Carl Cone, left recently for Swainsboro, Ga., where she will spend the rest of the summer with her grandparents, Mr. and Mrs. L. W. Thompson.

Mr. L. A. Hill of West Palm Beach was attending to business here Thursday.

Mrs. J. V. Davis and Misses Doris Phillips, and Gladys Parker are the guests of Mrs. Davis' daughter, Mrs. Frank Bass and Mr. Bass.

Mrs. Earl Maxson and Miss Dorothy Maxson accompanied Miss Marguerite Foust to Lakeland last Sunday. Miss Foust returned to her home in Indiana from there by bus.

Mr. and Mrs. G. C. Coburn left last Saturday for Boston. While there they will attend to shipping some furniture, which has been in storage. They expect to occupy their new home at Port Mayaca upon their return. After leaving Boston they will spend some time in their camp in the mountains of New Hampshire.

Mr. and Mrs. Wilbur Smith, Mr. and Mrs. Byron Todd spent several days in Alamo, Ga., visiting Mrs. Todd's mother.

Mrs. Marion Jones of Americus, Ga., has returned after visiting her sister, Mrs. H. L. Sears, Jr., for ten days.

Mrs. Cohen Blakey and son, Billy, and Mrs. Blakey's father, Mr. J. B. Elliott, spent Friday in West Palm Beach.

Mr. and Mrs. G. A. Perkins of Lake Harbor, spent Friday here with their son, Charles Perkins and Mrs. Perkins.

Mr. and Mrs. J. B. Crosby and son, Lewis, returned Tuesday after a months' vacation in Hot Springs, Ark.

Mr. and Mrs. Duncan Padgett returned Tuesday after a months' vacation in Lake Worth.

Mr. and Mrs. John Dulaney arrived home Tuesday from Tulsa, Okla., where they have been visiting friends and relatives for the past month.

Mrs. John Bolton returned Wednesday after a two weeks' vacation in South Carolina.

Julian Chandler was a visitor in West Palm Beach Tuesday.

A. Campbell underwent an appendix operation in the Good Samaritan hospital Tuesday.

Mrs. G. C. Inlow returned Tuesday after a two weeks' visit with her parents in Miami. She was accompanied home by her mother, Mrs. Husky.

Miss Frances Howell was a dinner guest Sunday night at the home of Mr. and Mrs. Roy Green, Sr., and their son, Roy, Jr., in Belle Glade.

Miss Dorthey June York arrived home Monday from Tallahassee where she has been attending summer school.

Mrs. Oscar Dyer of Tennessee arrived in Pahokee last week to visit at the home of Mr. and Mrs. T. J. Dickson. Also visiting Mr. and Mrs. Dickson are Mr. and Mrs. Tom Boles of West Palm Beach.

E. Davis was the week-end guest of Mr. and Mrs. J. T. Spadaro at their home in Boca Grande.

Mr. and Mrs. Harold Rosenberg and children returned Saturday from Buffalo, N. Y.

Mr. and Mrs. Olin Cowart spent Sunday deep sea fishing.

Mr. and Mrs. Ray Lee and son, Kenneth, spent Sunday in West Palm Beach.

Mr. and Mrs. Lon Adams and Miss Jean Clark spent last Thursday afternoon in West Palm Beach.

Earl Lee returned Sunday after spending a week in Wauchula with his parents.

Mrs. J. M. Elliott has as her guests this week her mother and two sisters, Mrs. C. J. Wheeler, Edna Pearl and Mildred of Lakeland.

Mrs. B. Elliott who has been a patient in the Good Samaritan hospital returned to her home Sunday.

Mrs. Olin Cowart left Thursday to visit her parents, Mr. and Mrs. J. R. Neal, in Wauchula. She was accompanied by her sister, Miss Ethel Mae Neal, and Miss Dorthey Hendry who have been her guests for the past month.

Mrs. Frank Bass spent Monday afternoon in Belle Glade.

Edgar Wilder left last Saturday to visit his grandmother in Bowling Green for several weeks.

Mrs. Minnie Lee Hughes and Gordon Vann were visitors in West Palm Beach Wednesday.

Attorney Thad Whidden was a business visitor in West Palm Beach Monday.

Emery Forthe returned yesterday from Valdosta, Ga., where he has been visiting his mother for several weeks.

Mr. and Mrs. Earl Hine and two sons, C. J. and Jack, of Havana, Cuba, arrived Tuesday for a few days visit with Mrs. Hines' brother, J. V. Fourmy, and Mrs. Fourmy.

Mr. and Mrs. Jack Barrett, Johnny Thomas and Terry Lee spent Sunday deep sea fishing.

Mr. and Mrs. J. W. Cochran spent last week in Miami.

Miss Sadye Todd and Mrs. Lois Dalton spent Monday in West Palm Beach attending a beautician meeting.

Mr. and Mrs. Brooks Bateman and Mr. and Mrs. Dalton spent Friday deep sea fishing off the coast of Ft. Myers.

Rudolph, Frances and Claude Faulk and Miss Becky Bass left Saturday for Tennessee. Mrs. W. H. Vann accompanied them as far as Chattanooga en route to Silver Creek, N. Y.

Rep. R. Boe and Mrs. Boe and son of Moore Haven spent Sunday as the guests of Mr. and Mrs. F. Bruce Johnson.

Mr. and Mrs. Pete Harrison left Saturday for points in Kentucky where they will visit friends and relatives.

Mrs. Johnny Fourmy has returned after several weeks' visit with friends and relatives in Mt. Olive, S. C.

Mr. and Mrs. J. M. Elliott, Mrs. C. J. Wheeler, Edna Pearl and Mildred Wheeler spent Wednesday in Clewiston.

TORREYA STATE PARK IS BEING DEVELOPED

The Florida Board of Forestry has approved the acquisition of the Torreya State park by the Florida Park service, states C. H. Schaeffer, acting state park director.

The park is located on the bluffs of the Apalachicola river north of Bristol near the town of Rock Bluff. The lands which formed the nucleus for the park were donated by the Neal Lumber and Crate company of Blountstown through the interest of Messrs. Neal, Parker, and Hayes of that company. The Jackson heirs of Bristol and the Boykin, Stewart, McDaniel, Williams, and Lee families also donated portions of the area without cost to the state. Mr. Jackson of Bristol and Mr. Phillips of Rock Bluff, as well as other interested, Gadsden and Liberty county citizens, assisted in securing land donations. The entire area was secured at no cost to the state.

The primary purpose of the park is to provide an area where the Torreya tree will forever be preserved, and where this tree can be viewed and easily examined by scientists, nature lovers, and the general public. The range of this tree is limited to the east bank of the river from Bristol to a short distance north of the Florida line. In addition to the Torreya tree, the area contains a large number of fine forest trees exhibiting the climax type of hardwood forest.

The high river bluffs show the majestic sweep of the river and furnish excellent birds-eye-views of countryside which, in that particular locality, is almost mountainous and quite unlike the rest of Florida.

The park is of considerable historical interest inasmuch as on one of the bluffs there are six gun emplacements commanding the river. They are in an excellent state of preservation with the communicating trenches and observers' pits plainly visible. Schaeffer states that they are better preserved than those he has viewed at Chancellorsville, Spotsylvania, Fredericksburg, Gettysburg, and other battle grounds of the war between the states.

This park will be developed by the newly created Florida Park service with the assistance of the State Park branch of the National Park service by means of a CCC camp. An advance party under the direction of Captain H. G Le Garde of the army is on the ground at the present time preparing the site for the camp. Both Regional Officer Gadsby and Inspector Vinten of the State Park division of the National Park service are greatly pleased with the selection of this site.

HINTS TO HOUSEWIVES

DRESS FOR SCHOOL

How is a dress suitable for school wear and for harmonizing with the occasion?

We can think of school as a kind of workshop where we spend many hours working with other people. The school dress, then, is a kind of work dress, and as such it must not soil or muss easily. Since it is worn nearly every day, it must be made of a material that will wear well and must have color and style that will not become tiresome. As a work dress, it must be comfortable and cannot have trailing sleeves or draped skirts which will get caught and torn, or tight sleeves, waistbands, and collars which will hinder our daily activities.

The school dress which is best suited to its purpose will satisfy all these utilitarian requirements. It should have all the attractiveness and beauty that belong to the thing which serves its purpose in the best possible way. There can be no genuine beauty if utility is not satisfied. A satin evening gown ceases to be beautiful when worn in the science laboratory; a sleeveless, beruffled frock may be attractive on the dance-floor but it loses its attractiveness in class.

Let us not imply, however, that the school dress, in order to be thoroughly suited to its purpose, must be dowdy or commonplace. It should have all the charm and attractiveness that results from fine color and good design. There is no breach between utilitarian and esthetic qualities. Indeed, the one is dependent upon the other and the two must be combined to produce an attractive and appropriate school dress.

Other articles of the wardrobe as well as dresses should be judged for their appropriateness to the occasions upon which they are to be worn. What are the requirements of the shoes suitable for school wear? Since they are worn so constantly, they should be comfortable for wear during a long period of time. Thin soles, high heels, pumps with no straps, and pointed toes are certainly all to be avoided in the school shoe. The school shoe is worn frequently and should be made of materials that will give good service. Satin pumps and thin, fancy leathers are inappropriate for this reason, if for no other. Conspicious shoes also should be avoided. The latest fad in colored heels and cut leather applique ornamentation on the toes will become tiresome after a short time. Real beauty is never to be found in fine materials and elaborate designs if those materials are not suited to their purpose.

We should select every article for school wear with these thoughts in mind: Is it too striking in design or color; will it soil or muss easily, be hard to clean; and is it comfortable? Unless we satisfy these requirements we cannot be well dressed at school.

Essentials of safety are cleanliness, order, and a place for everything.

"Much of the happiness of life depends upon our willingness to give up our solo and take part in the chorus."
